

REMARKS

This amendment is in the nature of a request for reconsideration.

Claims 13 and 14 have been combined.

Applicant's Contribution

A high value $\sim 200 - 1500 \Omega$ square 1000\AA film is not seen in the references Norimitsu, Kaiser et al., Hohenstein "Cermet Resistors..." or Jankowski et al.

The Present 35 U.S.C. Rejection

It is not seen how the above four references could be combined by; one having ordinary skill in the art, arriving at the now claimed subject matter when only a single reference having some of the properties teaches "The thickness of the resistive films can be less than 1 micron thick" as pointed out by the Examiner in the third paragraph of page 6 of the Office Letter.

Accordingly, it is believed that this amendment places the application in condition for allowance, which notice is respectfully solicited.

Respectfully submitted,

Conrad O. Gardner
